

# Sahil Pal

Product & UI/UX Designer | AI-powered B2B SaaS | Design Systems | Complex Workflows

Bengaluru, India | +91 90712 98208 | sahilpal55@gmail.com | linkedin.com/in/sahil-pal-design | sahilpal55.github.io/portfolio

---

## Summary

Product designer with 4+ years turning ambiguous, high-complexity workflows into clear, usable products across AI hiring, B2B SaaS, PropTech, healthcare, agri-tech, and ed-tech. Works end-to-end from discovery and UX research through interaction design, high-fidelity UI, design systems, Webflow delivery, design QA, and engineering handoff. Comfortable owning design solo, using AI tools to move quickly, and explaining tradeoffs to leadership.

## Selected Project

---

### AutoReport

Independent product | Product design & implementation | Live project | [GitHub repo](#)

Designed and built a privacy-first, local-first AI reporting app that turns recurring website analytics into history-aware narrative reports. Open-source, self-hosted, and user-controlled by design.

## Experience

---

### Webflow Developer & Visual Designer (Freelance)

Jan 2026 – Present

MAV Consulting Group | AI-powered PropTech CRM

Remote

- Leading brand, website, and product-design exploration for an AI-powered PropTech CRM, turning early concepts into stakeholder-ready prototypes, visual direction, and client presentations.
- Shipped 10+ responsive Webflow landing pages and 7 custom calculators, clarifying product messaging and demo-intent journeys across focused conversion paths.
- Introduced a structured two-round review process that cut revision cycles from 4–5 rounds to 2 and reduced delivery time by 30%.

### Product & UI/UX Designer (Full-time)

Dec 2023 – Dec 2025

WeCP (We Create Problems) | B2B SaaS, AI Hiring Platform

Bengaluru

- Sole designer across product and marketing for two years, setting design direction and presenting rationale, tradeoffs, and delivery recommendations directly to leadership.
- Co-designed Sherlock, an AI hiring product launched on Product Hunt, defining UI flows, interaction patterns, launch assets, and its marketing website from concept through release.
- Architected recruiter, candidate, and onboarding flows for the AI interviewing platform, translating requirements into high-fidelity screens, edge states, and engineering-ready specs.
- Redesigned the marketing website and built 40+ responsive Webflow pages with a modular component system, improving engagement and lead conversion by 20–30% while enforcing WCAG and responsive QA.

### UI/UX Designer (Full-time)

Sep 2022 – Nov 2023

Appiness Interactive Pvt. Ltd. | Product Design Studio

Bengaluru

- Simplified core farmer task flows for AgriApp using Jobs-to-be-Done research and low-literacy, mobile-first UX patterns for tens of thousands of active farmers.
- Designed a community portal and admin dashboard for Manipal Hospitals, translating complex healthcare workflows into role-based information architecture and task paths.
- Standardized scalable design systems across agri-tech and healthcare products, strengthening engineering handoff through documented components and interaction states.

### UI Designer (Contract/Remote)

Jun 2022 – Aug 2022

MemoNeet (MemoApps) | Ed-Tech

Remote

- Streamlined NEET learning flows through usability reviews, interaction simplification, and precise Figma specifications for engineering handoff.

## Skills

**Product Design:** Product discovery, UX research, customer feedback, usability testing, heuristic evaluation, Jobs-to-be-Done, information architecture, journey mapping, interaction design, prototyping, high-fidelity UI, design QA.

**Systems & Collaboration:** Design systems, component libraries, reusable patterns, edge states, accessibility (WCAG), PM/engineering collaboration, stakeholder storytelling, design rationale, sprint-ready handoff, roadmap input.

**AI, Web & Tools:** Figma, Webflow (advanced), Framer (advanced), Figma Make, Framer AI, Google Stitch, Claude, HTML/CSS, Lottie, GSAP, Adobe Illustrator, Miro, Notion, Jira.

## Education & Certifications

---

**Bachelor of Computer Applications (BCA)** | Rosary College of Commerce & Arts, Goa | CGPA: 7.63

**UX/UI Design & Design Systems** | Interaction Design Foundation

**Fundamentals of Digital Marketing** | Google Digital Garage
