

Sahil Pal

Product & UI/UX Designer | AI-Powered B2B & B2C SaaS | Design Systems | Complex Workflows

Bengaluru, India | +91 90712 98208 | sahilpal55@gmail.com | linkedin.com/in/sahil-pal-design | sahilpal.framer.website

Summary

Product designer with 4+ years turning ambiguous, high-complexity workflows into interfaces people actually use - across AI hiring platforms, PropTech CRMs, and healthcare systems, with earlier work in agri-tech and ed-tech. Works end-to-end, from research and journey mapping through high-fidelity delivery, building design systems alongside the product instead of bolting them on after. Comfortable owning design solo, translating fast-moving AI tooling into stakeholder-ready direction, and holding the line on usability under tight timelines.

Experience

UI/UX & Webflow Developer, Freelance

Jan 2026 – Present

MAV Consulting Group | AI-Powered PropTech CRM

Remote

- Leading brand, website, and product-design exploration for an AI-powered PropTech CRM using Claude and Figma Make, turning early-stage concepts into stakeholder-ready prototypes and visual direction.
- Shipped 10+ responsive Webflow landing pages and 5+ interactive custom calculators, sharpening the demo-intent journey with clearer product messaging and conversion paths.
- Introduced a structured two-round review process that cut revision cycles from 4–5 rounds to 2, by tightening how critique, decisions, and handoff expectations get captured.

UI/UX Design Engineer, Full-time

Dec 2023 – Dec 2025

WeCP (We Create Problems) | B2B SaaS, AI Hiring Platform

Bengaluru

- Sole designer across product and marketing for two years, setting design direction and presenting tradeoffs directly to leadership.
- Helped design Sherlock, an AI hiring product launched on Product Hunt — defining UI flows, interaction patterns, and launch assets, and building its marketing site from concept to release.
- Architected core recruiter, candidate, and onboarding flows for WeCP's AI interviewing platform, converting early requirements into high-fidelity screens, edge states, and engineering-ready specs across assessments, evaluations, and AI-led interviews.
- Redesigned WeCP's marketing website on a modular Webflow component system (40+ pages) for sharper positioning, leading heuristic evaluation, IA, and WCAG-compliant QA across all public surfaces.

UI/UX Designer, Full-time

Sep 2022 – Nov 2023

Appiness Interactive | Marketing & Design Agency

Bengaluru

- Simplified core farmer task flows for AgriApp, applying Jobs-to-be-Done research and low-literacy, mobile-first UX patterns for tens of thousands of active users.
- Designed a community portal and admin dashboard for Manipal Hospitals, translating complex clinical workflows into role-based information architecture for clinical and content teams.
- Standardized design systems across agri-tech and healthcare products, documenting components and interaction states to speed up engineering handoff.

UI Designer, Freelance

Jun 2022 – Aug 2022

MemoNeet (MemoApps) | Ed-Tech

Remote

- Streamlined NEET exam-prep learning flows, running usability reviews and preparing precise Figma specs to speed up engineering handoff.

Skills

Product Design	Discovery & UX research, usability testing, heuristic evaluation, Jobs-to-be-Done, information architecture, journey mapping, interaction & motion design, high-fidelity UI, prototyping, design QA
Systems & Collaboration	Design systems, component libraries, accessibility (WCAG), PM/engineering handoff, stakeholder storytelling, roadmap input
Tools & AI	Figma, Webflow, Framer, Figma Make, Framer AI, Google Stitch, Claude, HTML/CSS, React, Lottie, GSAP, Illustrator, Miro, Notion, Jira

Education & Certifications

Bachelor of Computer Applications (BCA), Rosary College of Commerce & Arts, Goa

CGPA: 7.63

Design Thinking; UX Design & Design Systems

Interaction Design Foundation

Product Design

Udacity
